CANADIAN MERCHANT FLEET LISTS

In response to many requests during the past several years, the Canadian Transportation Agency is pleased to reinstate the publication of the Canadian Merchant Fleet Lists.

These lists are a synopsis of Canadian registered vessels in operation in Canadian waters by type and area of service. Information contained in the lists is compiled from the Canadian Ship Database which the Agency uses to carry out its mandate pursuant to the *Coasting Trade Act*. Under the *Coasting Trade Act*, the Agency has to determine whether or not Canadian ships are suitable and available to provide a service or perform the activity described in a coasting trade licence application. These lists are a useful tool for the marine industry as well as government departments and agencies.

The lists contain details on all Canadian registered vessels of 100 gross tons and over, and the information appears in the format and language in which it was provided to the Agency by the marine industry. Lists B - E and G - H also include some vessels of less than 100 gross tons, if they are known. However, information on vessels of less than 100 gross tons is incomplete at present and will be included as the data becomes available. Lists F and I include vessels of miscellaneous types which remain on Canadian register, but they are no longer in operation or their use is unknown. These two lists are for internal use only.

The Canadian Merchant Fleet Lists are published in two volumes containing self propelled and non-self propelled vessels, and in separate English and French versions. These lists and other Canadian Transportation Agency publications are available on the website www.cta.gc.ca.
